Greetings!

New Hampshire Science Olympiad, in partnership with Saint Anselm College, is proud to announce the continuation of scholarship opportunities for Science Olympiad participants! Saint Anselm College has been the proud host of the New Hampshire Science Olympiad competition for the past nine years. In those eight years, the Division C competition has grown considerably to include, in 2017, thirty two teams from twenty one schools in two states! Saint Anselm College understands how valuable the skills gained by participating in Science Olympiad are to future success. Students who commit to a goal, work strongly as part of a larger team, and use intellectual creativity to work toward success are both hallmarks of Science Olympiad participants and Saint Anselm students.

As such, we have created scholarships opportunities for *any* student who has, at any time in their high school career, competed in Science Olympiad! These grants, ranging from \$2,000 to \$4,000 a year and renewable annually, should be applied for after submitting an application to Saint Anselm College. A link to the application can be found at www.anselm.edu/scienceolympiad and will also be provided directly to applicants who indicate their participation in the event.

We are grateful for the opportunities these awards will provide for Science Olympiad students and look forward to our continued partnership with our host institution!

Regards,

Dr. Nicole Eyet
State Director, New Hampshire Science Olympiad
Associate Professor of Chemistry, Saint Anselm College
